

A Snapshot of Proudfoot in...

Engineering

What if you could...

- Improve client satisfaction by consistently delivering projects on time and within budget?
- Enable your organization to improve cooperation between sales, engineering, production and service?
- Fundamentally change the way you work:
 - Integrate sales and operations system to accurately translate sales into resource needs
 - Break down silos both within the engineering departments, and with other divisions
 - Deliver engineering projects seamlessly through local and global resource pools
 - Integrate process, system controls, KPIs and quality
 - Balance workload across different organizational units
 - Integrate program management across all projects

Client Benefits Realized

15-30%

Improved overall engineering productivity

10-15%

Project lead time reduction

8-20%

Improved interface time with other divisions

20-30%

Reduction in budget overruns

5-15%

Reduced efforts in managing bids and transfer to project

10-15%

Reduced sub-contractor costs

We are proud to have supported engineering transformation initiatives of these best in class organizations
