

Proudfoot: Your partner in...

Transportation

What if you could...

- Increase sailing days per ship and voyages per year to drive higher revenue and lower operating costs?
- Radically improve your maintenance execution utilizing Kaizen and SMED methodologies to reduce event cycle time length?
- Implement a management organizational structure to streamline roles and responsibilities and foster active management techniques to drive higher equipment utilization rates?
- Establish cutting-edge management operating systems to enable your transportation teams to:
 - Implement safe productivity improvements
 - Ensure ownership of all key processes
 - Institute a clear focus on asset utilization and Overall Equipment Effectiveness (OEE)
 - Enhance responses to customer demands
 - Accelerate major asset, system, and component maintenance projects

Historical results achieved
